## David Brothers Begins Green Roof Project at Mercer Museum

David Brothers has begun work on a 9,300 square foot green roof project at the Mercer Museum in Doylestown, PA. This project is part of the expansion at the Museum, scheduled to open Spring 2011. The roof is an extensive system with four inches of growth media, planted with sedum cuttings.

A green roof reduces the impact of a building on the environment. It reduces storm water run off, improves air quality, and saves energy by providing insulation to the building.

David Brothers is a member of the *Roofscapes Network* and has completed many green roofs including projects at Temple University, Ambler Campus, the Friends Center in Philadelphia and St. Mary Medical Center, Langhorne, PA.

To inquire about a green roof or other project on your property, contact us  
[www.DavidBrothers.com](http://www.DavidBrothers.com) or call (610)584-1550 or (215) 247-2992.
